

IVS PROJECT TADIFAN

Tadifan team

AGENDA

Calculator

Development

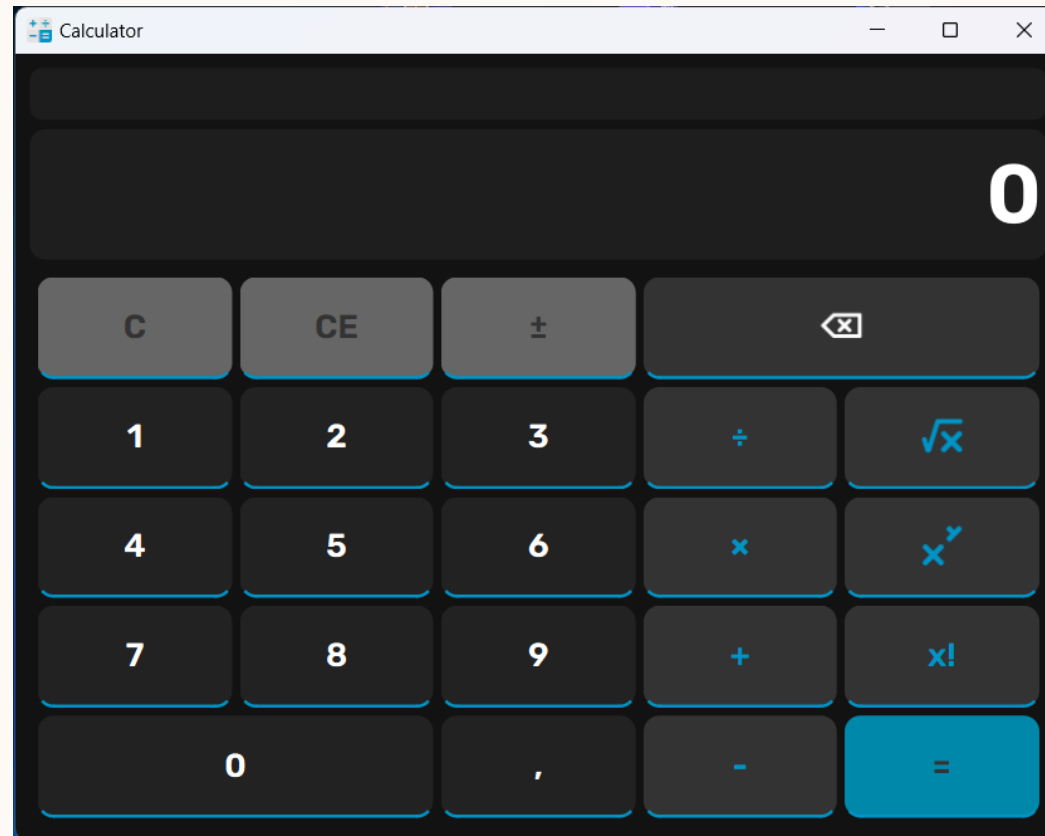

Expectations vs Reality

Plans for improvement

Summary

INTRODUCTION

Below you can see our calculator, it performs simple operations and has a history line.

DEVELOPMENT

SELECTED TECHNOLOGIES

Selected language: Python
Create an installer: Inno Setup
Design: Qt Designer
Versioning: GitHub

EXPECTATIONS VS REALITY

- Time management
- Software development skills
- Development plan
- Work independency
(working together at one day)

**“ALONE WE CAN DO SO LITTLE.
TOGETHER WE CAN DO SO
MUCH.”**

Helen Keller

PLAN FOR FURTHER IMPROVEMENTS

PLANNING

Bug fixes and implementation of further features

DESIGN

mockup implementation and possible design changes

LAUNCH

Complete testing, multiplatform testing and release of the new version

SUMMARY

In general, we were satisfied with the experience we got from the project, we learned a lot of new things and did a great job in the team. We believe that our product came out quite good, but we have room to grow!

THANK YOU

Tadifan team
